

Voluson S8 with Touch Panel

GET AHEAD. STAY AHEAD.

Voluson™
A Healthier Future for Women

KEEP MOVING FORWARD WITH THE **Voluson S8 with Touch Panel**

A busy practice demands a reliable ultrasound system that doesn't slow you down—it speeds you up. Boost your efficiency and productivity with the Voluson S8 with Touch Panel: the smart investment that allows you to set the pace. Save valuable time with fast, clear, and consistent imaging and automated tools that transform your workflow. Experience more flexibility with the ultrasound that fits your clinical specialty and your budget. Leverage Voluson's entire ecosystem for maximum uptime and efficient reporting to gain even more momentum.

Simplify Your Day

The Voluson S8t is designed to make you more productive by removing daily roadblocks. Our AI automated tools, in combination with the system's easy, intuitive operation, allow you to work with more ease and efficiency while still delivering the same high-quality care your patients have come to expect.

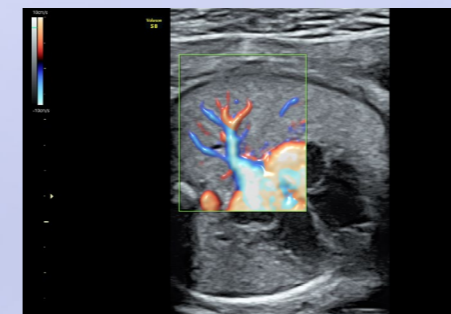

GET AHEAD. *Effortless imaging*

Capture diagnostic images quickly and confidently with our Voluson Core Architecture. Just place the transducer and start scanning to acquire images with minimal manipulation. Get the answers you need with our advanced probe technology and highly sensitive color Doppler.

Experience greater certainty in first trimester and for detailed obstetrical exams with our high-frequency XDclear™ single crystal C2-9 probe that delivers exceptional detail and contrast resolution.

Enhance visualization of small vessels and borders in the fetal heart with Radiantflow™; powering greater color sensitivity for a more dynamic 3D-like appearance.

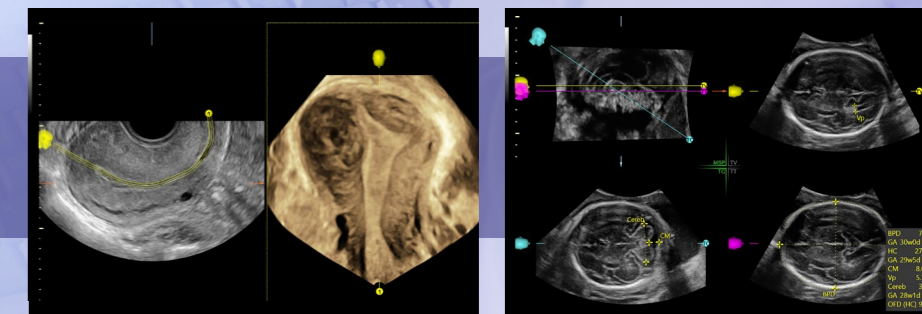

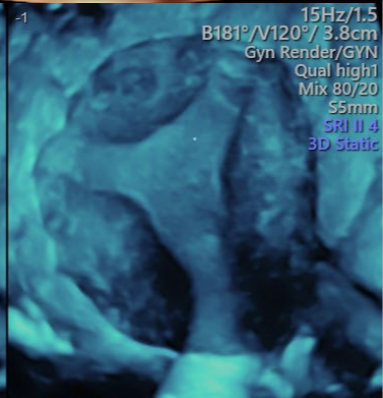

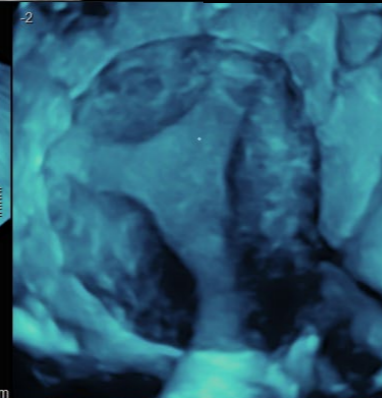

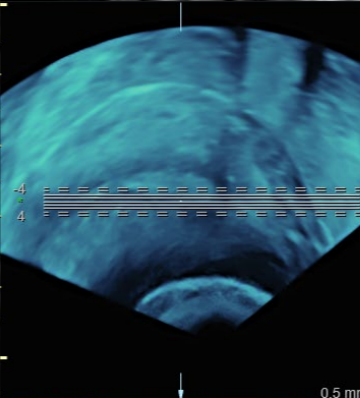

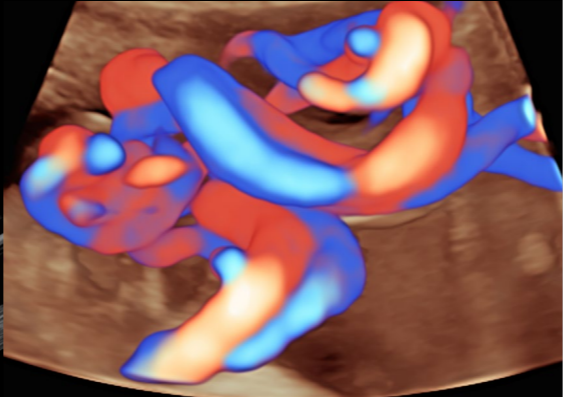

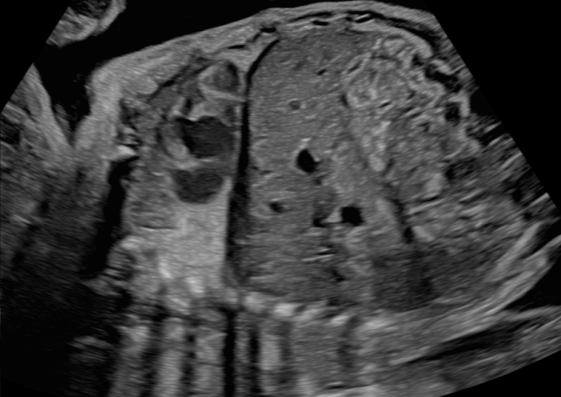

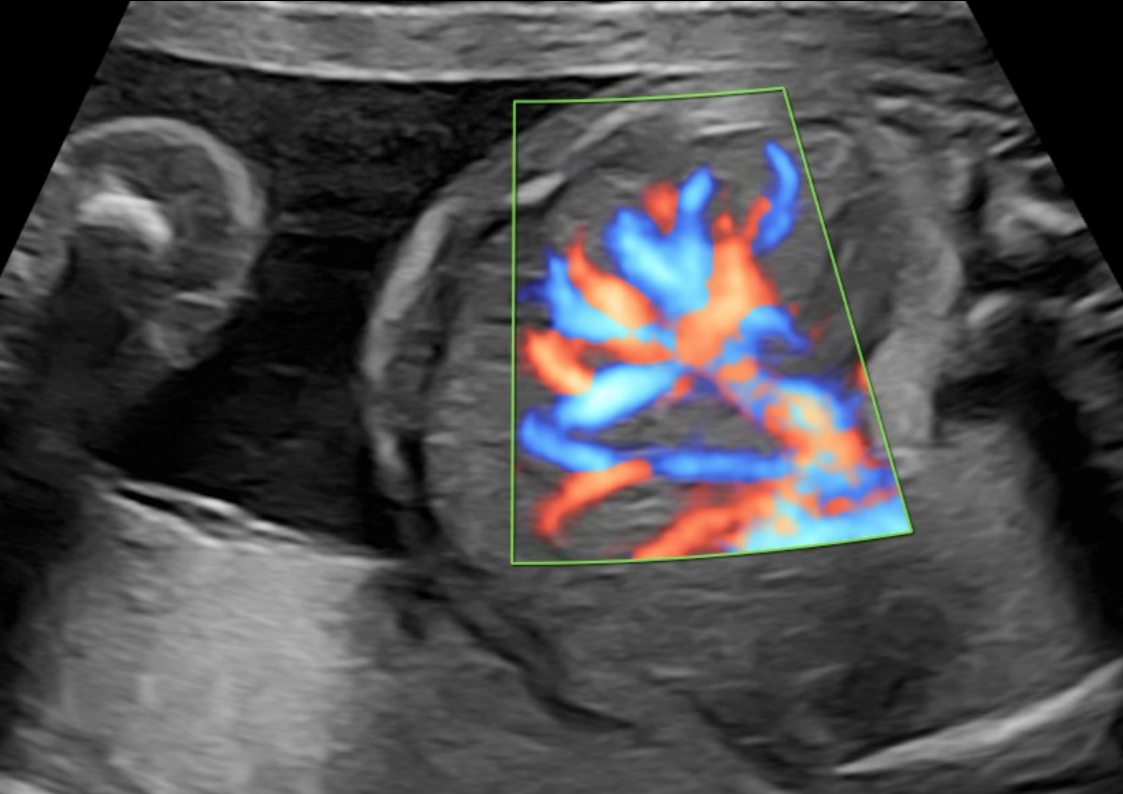

Spending extra time on incomplete exams and rescans is the last thing a busy practice needs. Enhance efficiency, improve reproducibility, and reduce keystrokes for repetitive tasks with our suite of Sono-Automation tools and our Scan Assistant protocols.

Incorporating 3D into your practice is easier than ever with Uterine Trace. From a standard view, simply trace the endometrium and the system automatically acquires a volume and then extracts the critical coronal view.

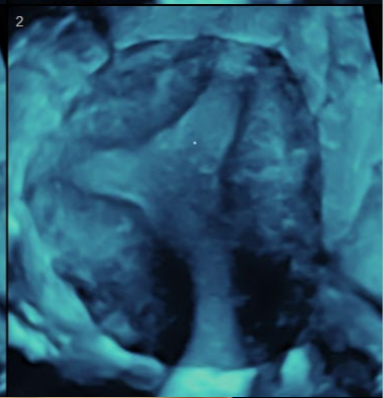

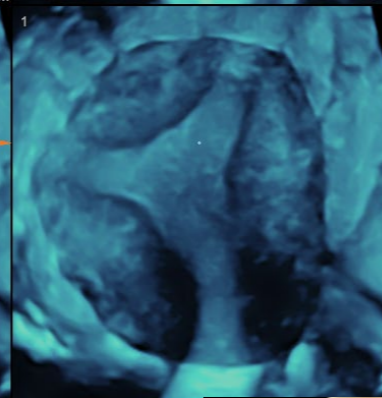

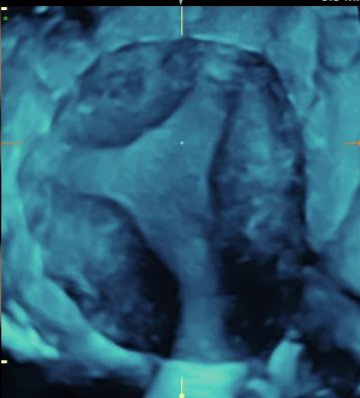

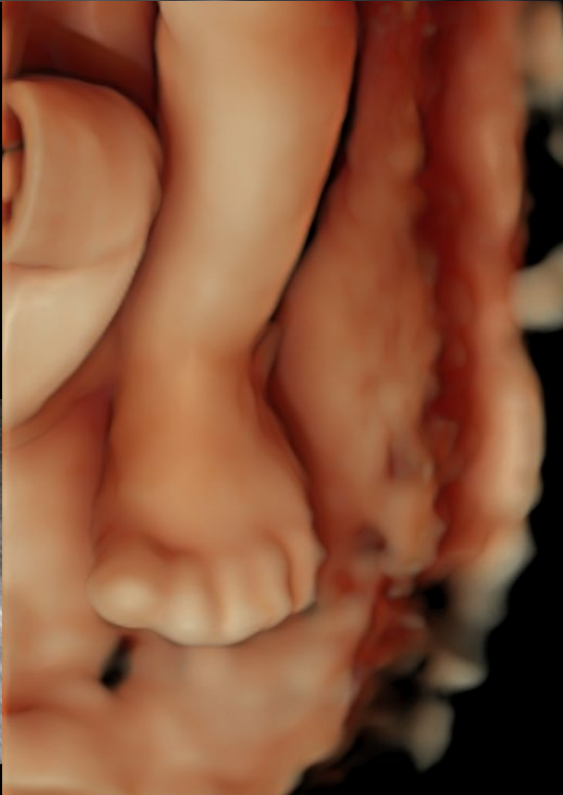

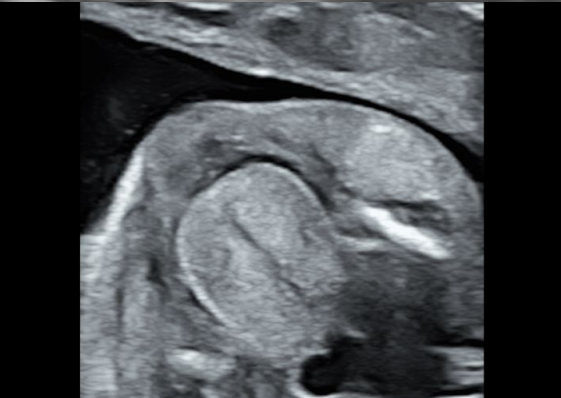

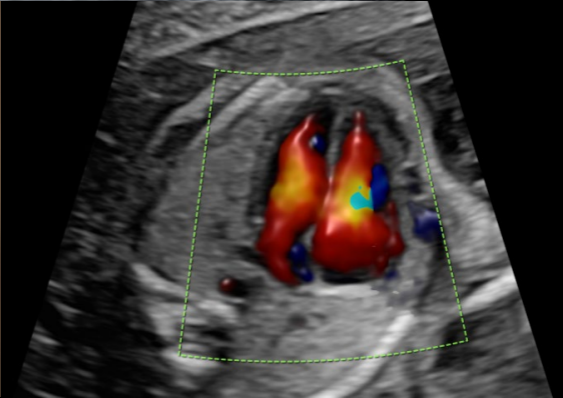

Simplify assessment of the fetal brain with SonoCNS. This sophisticated, AI-powered, deep-learning technology helps properly align and display recommended views and measurements of the fetal brain.

Experience More Flexibility

GET AHEAD.

Built to suit your specialty

The system is built for freedom. For flexibility. For you. With advanced ergonomics and features that focus on your clinical specialty, the Voluson S8t offers both comfort and choice at an affordable price.

The ultrasound system is height adjustable and features a swivel control panel and articulating monitor to maximize comfort and help reduce the risk for injury.

You can also choose the best features to support your specific clinical needs with the ability to scale in the future—making it even more cost-effective.

Get the Support You Need

STAY AHEAD.

Leverage our entire ecosystem

The true value of owning an S8t is access to everything Voluson. As your partner for secure image archiving, sharing, and reporting solutions, Voluson also provides flexible service support to keep your system secure and up to date. Plus, you can explore education and training opportunities to continue expanding your expertise.

Connect your system to InSite™ to easily monitor asset management and system health while Probe Check keeps your probes operating at peak performance. Get all your questions answered with real-time clinical and technical support.

Enjoy membership in the Voluson Club, the only ultrasound community dedicated to the education and collaboration of women's health providers.
